Contents

Special Issue: Practical Applications of Coupled Process Models in Subsurface Environments
Guest Editors: M. Ibaraki, R. Therrien

Preface 1

Evaluating the sensitivity of a subsurface multicomponent reactive transport model with respect to transport and reaction parameters
C.L. Tebes-Stevens, F. Espinoza and A.J. Valocchi 3

Numerical simulation of a fine-grained denitrification layer for removing septic system nitrate from shallow groundwater
K.T.B. MacQuarrie, E.A. Sudicky and W.D. Robertson 29

Predicting natural attenuation of xylene in groundwater using a numerical model
W. Schäfer 57

Multi-component reactive transport modeling of natural attenuation of an acid groundwater plume at a uranium mill tailings site
C. Zhu, F.Q. Hu and D.S. Burden 85

Modelling the closure-related geochemical evolution of groundwater at a former uranium mine
J.G. Bain, K.U. Mayer, D.W. Blowes, E.O. Frind, J.W.H. Molson, R. Kahnt and U. Jenk . . . 109

Multiphase transfer processes in waste rock piles producing acid mine drainage 1: Conceptual model and system characterization
R. Lefebvre, D. Hockley, J. Smolensky and P. Gélinas 137

Multiphase transfer processes in waste rock piles producing acid mine drainage 2. Applications of numerical simulation
R. Lefebvre, D. Hockley, J. Smolensky and A. Lamontagne 165

Gas production and migration in landfills and geological materials
M. Nastev, R. Therrien, R. Lefebvre and P. Gélinas 187

Migration of colloids in discretely fractured porous media: effect of colloidal matrix diffusion
J.G. Oswald and M. Ibaraki 213

Variable-density groundwater flow and solute transport in heterogeneous porous media: approaches, resolutions and future challenges
C.T. Simmons, T.R. Fenstemaker and J.M. Sharp Jr. 245
